Comments about [Marcy Playground](#) - Marcy Playground

- **Honeirsil**

Definitely one of the best buys out there. Such a quiet record, airy and distinct sounds, Rhino records has done well with their master pressings. For an incredible press, well worth the money, and will appreciate in price well.

- **Coron**

Someone in the US please sell me this for a fair price

- **Andriodtargeted**

Sound quality of the vinyl press is awesome. Totally worth the money. Can we please get Cracker to use this engineering team to reissue Kerosene Hat on vinyl.

- **Negal**

I'd do anything for that!blah blah ten words blah blah

- **Pryl**

Wow the asking price for this seems to have more than doubled overnight. Stupid RSD, don't know why it had to be so limited.

- **Manesenci**

Just bought the record at one of their shows. Vinyl is an orange-pinkish splatter. Don't think it's been added to Discogs yet. Got it signed and everything!

- **Jek**

Yes, they are touring right now as they did some concerts close to where I live in Southern California. There have been rumors of a second pressing and maybe there are plans to release a splatter or even a version without the 7".

- **SARAND**

what?? are you saying they still play and tour? no way!

- **BlackHaze**

Finally scored a copy of this puppy - without paying through the wazoo. I am thankful! I haven't heard this puppy in 15ish years but many of the tracks have been cycling in my brain ever since. Forgotten awesome track: Saint Joe on the School Bus - "Aunt Mary, Aunt Mary!" such a good song. And of course, one of my faves: 'opium' - "bluuueeeee , like water.." For some reason I always loved this album and remember playing guitar along to the tracks. Record sounds great!

- **Lanadrta**

The flowers on the inside of the jacket sleeve are wonderful. Made my day even more than finally having my favorite album from the 90s on vinyl.

- **ĀḤ_Ÿøūrš**

The LP is amazing, but the bonus 7" was cut terribly for my copy. The lead-in groove has blobs of melted vinyl on most of it so the needle can mostly only be dropped right as Hallelujah begins. There's also a scuff on that track. Despite all that, the 7" pressing still sounds fairly decent. Curious if anyone else had any issues with the bonus 7"?

- **Sagda**

Mine sounds excellent, no complaints. Contact the label and see if they can issue a replacement for you.

- **Wilalmaine**

Glad to know the pressing quality is good. Usually with RTI there's no problem whatsoever. The album was not available for the Record Store Day in the country where I live unfortunately but I won't pay a silly amount of money for it since it was mastered from a 1630 tape which means it is represented in 44KHz/16bits just like a regular CD so I'll be impressed if that vinyl is superior. Anyways there's apparently a normal release without the bonus 7" on its way.

- **Mikarr**

That's indeed possible, yes. Back in the late '90s it was super common to record on 2" and store the final mix on DAT.

- **EXIBUZYW**

One person said it was recorded on tube equipment on a 2" tape.

- **Vizil**

I saw that on their Facebook page. Someone asked the label.

- **Legionstatic**

Yes, I'd love to see a source on that information as well.

- **Qane**

Where did you find out about a supposed normal release coming out?

- **Garr**

Absolutely beautiful quality pressing. Sound is clean, artwork is nice, and the flowery inner jacket is just the best finishing touch. Do not hesitate to pick this up (for a fair price of course)

- **Mr.Champions**

I went and purchased my copy in store for \$24.99

- **Milleynti**

What's the current price if you purchased in store vs. online?

- **sergant**

Sounds fantastic. Super excited to pick this limited release up.
